

4.1 Kit for bonding unit type LKE 300 / 300 V

Kit for bonding unit for installation into test stations, test systems, etc.

Standard version with 3-8 bonding modules (special versions with up to 32 modules).

Suitable for single lines with tinned ends, wire-end sleeves, flat-blade connections.

Special versions are also available for not bared line ends.

The bonding unit is equipped with bonding modules of the **LKV-12** model series in a grid size of 15 mm. The individual components are connected using a terminal strip or a SUB-D socket connector. A compressed air connection, NW 3 mm completes the unit. The kit contains all the individual parts required to manufacture a complete bonding unit ready for connection.

The **LKE 300 V** version also includes a 3-way magnetic valve 24V=. This allows opening simultaneously all bonding modules using the "Test finished-sample Ok" test signal.
